ACTIVITY BASED LEARNING

Name of the Faculty :- Ms. Umnah

Name of the Course :- Web Engineering

Name of the Activity :- Student Portfolio website

Students Involved :- 3rd year B.Tech

Portfolio

A portfolio is a systematic collection of student work that represents student activities, achievements and accomplishments over a period of time in one or more curriculum areas.

Description of the Activity

In this activity, students were given a task by the faculty. Each student is supposed to complete the task within the given time frame.

Students in the 3rd year of B.Tech were asked to create a portfolio website as a task to be completed at home. The time frame of 20 days was given to the students to complete the task. Students submitted their portfolios through Google Forms.

Required skills

HTML, CSS and JavaScript.

Instructions about the Activity:

● The first section must be a homepage as a portfolio of the students where visitors can have access to view the same.

● The second section must be a summary about yourself.

● List down all the projects completed and other achievements .

● Create a section for contact information.

OutCome of the Activity

● Hands-on experience on HTML,CSS and JavaScript.

● Enhances communication skills.

● Creates ideas and creativity.

● An accurate method of evaluating students' talents .

● Excellent approach to presenting work while applying for internships, opportunities for higher education, or part-time jobs.

● Strengthens student presence and visibility on the internet.

Conclusion

Activity-based learning engages students in several stages of problem-solving, like activity planning, activity performing and activity monitoring, and managing uncertainties presented during problem-solving. Students gain information and abilities that help them deal with challenges and issues in the real world.
